University of Wisconsin-Madison
xmiao27@wisc.edu

EDUCATION

Ph.D. in Statistics — *Fall 2021 - present*
University of Wisconsin-Madison, USA
- Advisor: Prof. Jiwei Zhao

M.S. in Statistics — *Fall 2019 - Spring 2021*
University of Wisconsin-Madison, USA

B.S. in Statistics — *Fall 2016 - Spring 2020*
Nankai University, China

RESEARCH INTERESTS

Model transportability, distribution shift, sensitivity analysis, semiparametric inference, and causal inference.

RESEARCH EXPERIENCE

Efficient Estimation for the Transportability Index with Neural Networks
Superviser: Prof. Jiwei Zhao — *Summer 2022, Spring 2023*

- Proposed a framework to study the sensitivity of the distribution exchangeability assumption in a transfer setting.
- Proposed a new measure, transportability index, that quantifies the sensitivity with respect to perturbation in quantity of interest.
- Provided an estimation procedure for the transportability index that guarantees asympototic normality when number of covaraties grows with sample size N with rate no greater than $\{\log(N)\}^{1/2}$.

Mediation Analysis of Microbiome Community Profiles
Supervisor: Prof. Kris Sankaran *Fall 2022*

- Introduced a framework for Logistic-Normal Multinomial mediation analysis where the response of interest is a microbiota profile.
- Developed a simulation procedure for calibrating inferences and guaranteeing false sign rate control.
- Built an R package for modeling, inference, and visualizations.

TEACHING EXPERIENCE

Teaching Assistant at UW-Madison

- STAT 301: Introductory to Statistics *Fall 2021, Spring 2022*

TAKLS

- Transportability Index: Inverse Probability Weighting with Neural Network. Statistics Graduate Student Association Seminar at UW-Madison, December 2022.

PROFESSIONAL ORGANIZATIONS

- Institute of Mathematical Statistics.
